

# M ILHAM HATTA

I am a fresh graduate of bachelor degree Informatics Engineering from State Islamic University of Sultan Syarif Kasim Riau. I have knowledge in the field of information technology, software development, data processing, and UI/UX Design. I have experience created a new student registration information system and a women's clothing catalog information system, created a deep learning model and UI/UX application design. I am ready to contribute to the team and focus on achieving company goals.

## EXPERIENCE

### Internship - Junior High School Telekomunikasi Pekanbaru

October - November 2022

- System Analysis and Design starts with analyzing the existing system and the system to be created, functional analysis, database table design, and interface design analysis.
- System implementation uses the Bootstrap framework for the front-end, PHP programming language for the back-end, and SQL for database queries.
- System testing with UAT on the modules created got results of 91%.

## PERSONAL PROJECT

### Clothing Catalog Information System

A system designed to display a complete list of women's clothing products on a web-based platform using the Laravel Framework.

### UI/UX Design for Travel Application
